

GREEN MEETINGS.

CLIMATE-FRIENDLY EVENTS: BENEFITS FOR YOU AND THE ENVIRONMENT

Conferences and events are of key importance for business communication and links with customers and partners. Unfortunately, it is very difficult to reduce the CO₂ emissions involved.

The dbb forum berlin is working together with atmosfair, the Berlin climate protection organisation, to reduce the CO₂ footprint of your event. The unavoidable CO₂ emissions caused by use of the building have already been calculated and offset in UN-certified climate protection projects. You also have the option to offset the CO₂ emissions caused by the event participants' travel and catering.

■ SIMPLE CALCULATION

Online emission calculator

■ EFFICIENT CLIMATE PROTECTION

UN-certified climate protection projects

■ IMAGE BOOST

Show your stakeholders that sustainability is very important to you.

■ EMPLOYEE MOTIVATION

Use climate-friendly events to show your employees the joint aim of "environmental and climate protection" in action.

■ COST SAVINGS

Reduce the external costs in arranging a company event e.g. by using public transport.

OUR PARTNER ATMOSFAIR: EXCELLENT CLIMATE PROTECTION

think • go climate conscious

atmosfair is a non-profit climate protection organisation under the patronage of Prof. Dr. Klaus Töpfer.

Your climate protection contributions facilitate the development of projects in the fields of renewable energy and energy efficiency.

atmosfair's projects are carried out in accordance with UN criteria and have CDM Gold Standard certification

For one thing, this guarantees that the projects really do save the corresponding amount of greenhouse gases. For another, the projects are designed to help local people and reduce pressure on the local environment.

ATMOSFAIR AT A GLANCE

- TESTED: 11-times winner in international comparative studies
- WELL-FOUNDED: Developed from a Federal Environment Ministry research project
- INDEPENDENT: No public funding
- TRANSPARENT: 92% of the income from donations goes to climate protection projects

CO₂ PREVENTION

We provide advice on how you can save energy and avoid emissions.

CO₂ CALCULATION

Calculate the environmental impact of your meeting - easy to do online with our emission calculator.

CO₂ OFFSETTING

atmosfair offsets your calculated CO₂ emissions in high-quality climate protection projects.
