

Total raw material productivity

Sum of gross domestic product and imports in relation to primary raw material input (RMI)

2010 = 100

* Preliminary result (as of 02/2026)

** Calculations by the Federal Statistical Office based on non-published differentiated data

*** Target according to "German Sustainability Strategy. Revision 2021": desired annual total raw material productivity growth rate from 2010 to 2030 corresponds to average annual growth between 2000 and 2010 (approx. 1.6%)
