Implementing Partner

C40 Cities Finance Facility

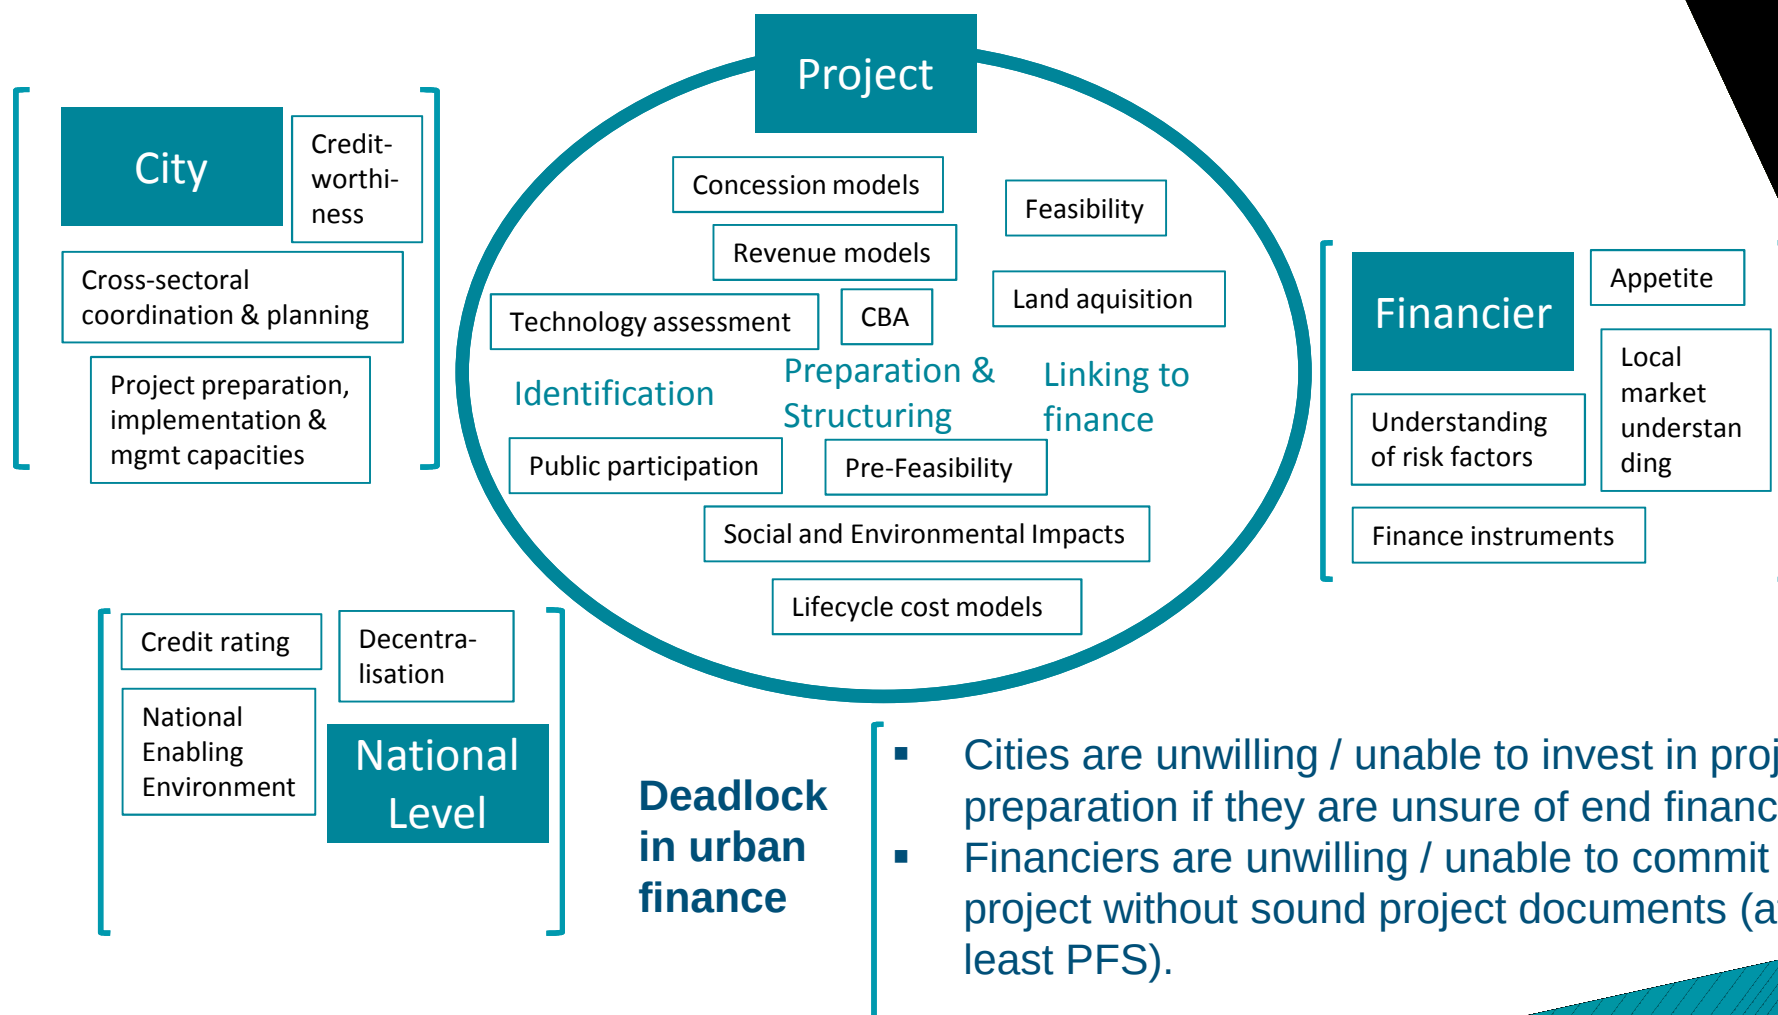

- o Cooperation project of C40 and GIZ, commissioned by BMZ, co-financed by USAID and BEIS; IADB as implementing partner in LAC
- o Overarching aim: Support cities in developing and emerging countries to reduce greenhouse gas (GHG) emissions and increase climate resilience by mobilising finance for city-level climate action

"This project will allow cities to leverage significant public and private financing for green infrastructure projects, enabling cities to accelerate their ambitious emissions reductions" Former C40 Chair and Rio de Janeiro Mayor, Eduardo Paes

The bankability mystery

(of urban projects)

Objectives

CAPACITY DEVELOPMENT

of city administrations to mobilise and access a broad range of financing instruments

KNOWLEDGE SHARING

beyond CFF partner cities via peer-to-peer learning and CFF stakeholders

PROJECT PREPARATION

of urban climate change investment projects for sustainable financing

PARTNERSHIPS

between cities, investors/financiers and their representations

Current partner cities

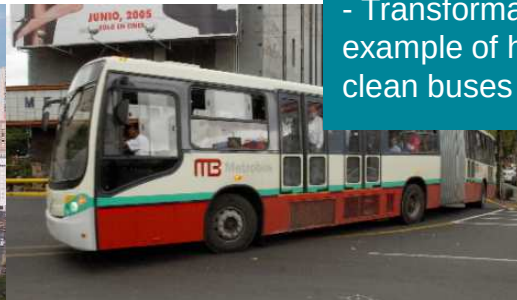

Durban, South Africa

- Clearing and maintaining 7000km of river streams
- Residents with lower income put into work (at minimum wage)
- Co-benefits: crime reduction, clean water, leisure areas

Mexico City, Mexico

- 22km Green Corridor on Eje 8 Sur
- Supporting city to create financing models for >100 electric buses and cycle lanes
- Transformative impact: Replicable example of how to access finance for clean buses in emerging cities

Bangalore, India

- Developing a financing and ownership model to roll-out electric buses
- 150 electric buses, electrifying some of the major routes
- Developing a business model to allow replacement of the bus fleet of 7,000 buses

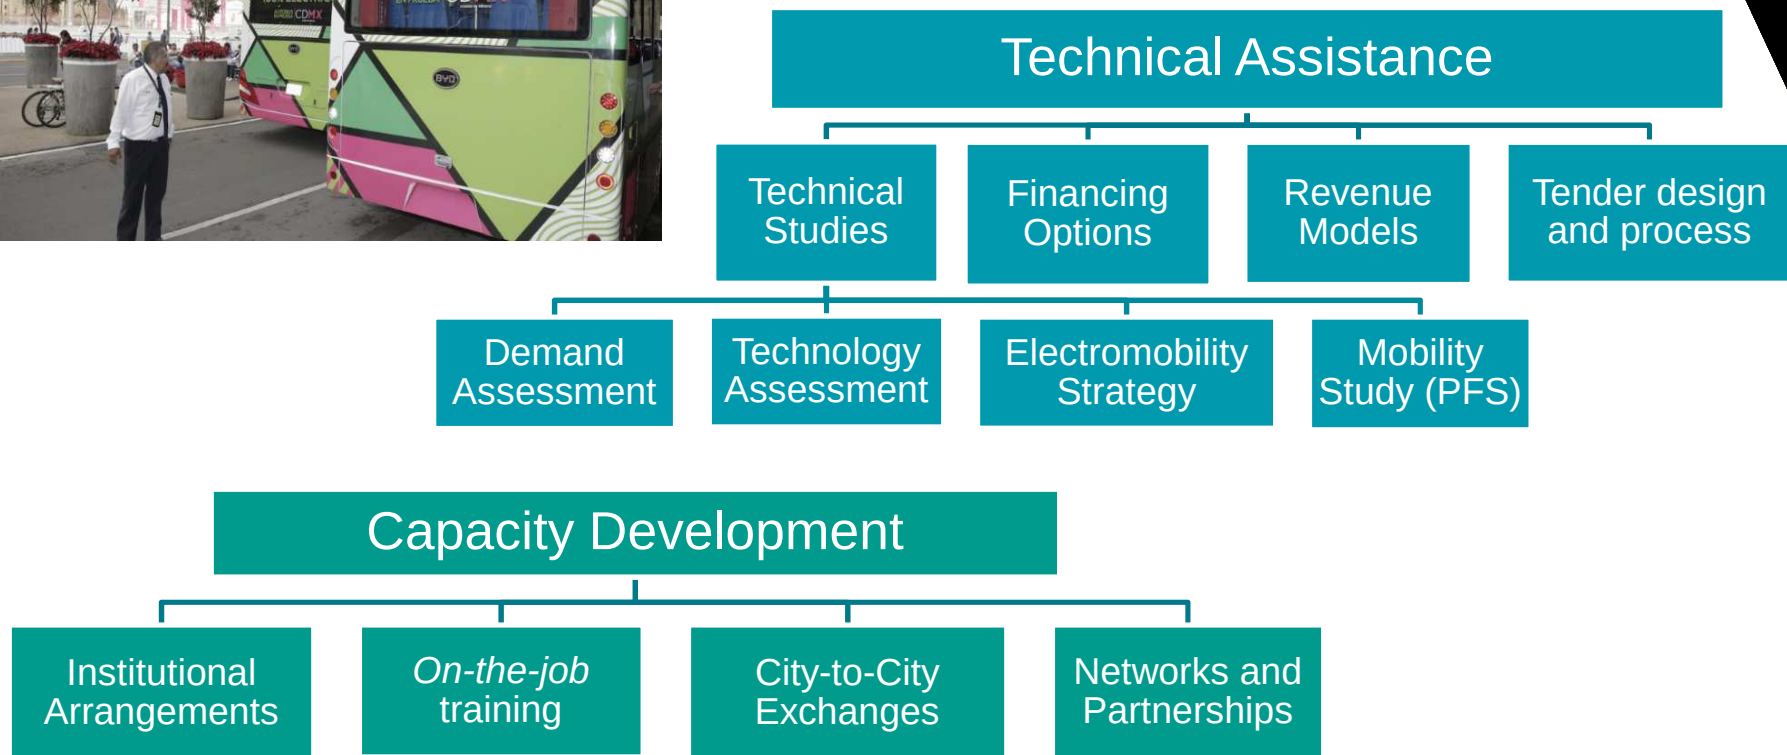

Bogotá, Colombia

- 24km cycle highway
- Part of cycling strategy to double cycling mode share to 10%
- Transformative impact: Innovative, replicable model of how to finance cycling infrastructure in emerging cities

C40 CITIES
FINANCE
FACILITY

Support to Mexico City “Eje 8”

The CFF operational principles

- **Demand-driven:** Cities apply for CFF support to advance their sustainability priorities.
- **City-focused:** Working in the best interests of supported cities and their projects, rather than a specific capital provider
- **Supporting strategic climate change action**
- **Financial and technical sustainability:** Supported projects must be based on financial and technical sustainability
- **Ownership and capacity development:** City administrations have the ownership of project preparation and the delivered capacity development
- **Catalytic nature:** supporting cities in sharing their learning and experiences
- **Transparency:** in all areas of delivered support
- **Outcome-oriented:** a key objective is that projects achieve financial close
