No. LIFE16 GIE/DE/000738

Looking at the developments on European level...

"Scaling up the circular economy from frontrunners to the mainstream economic players"

"Enhancing circularity in a toxic-free environment, avoid toxic cycles"

LIFE • ASK
REACH

Looking at the developments on European level...

"ensure availability of information on chemical content and safe use, by introducing information requirements"

"tracking the presence of substances of concern through the life cycle of materials and products"

- Introduction of a Digital Product Passport
- Widening the scope of the Eco-Design Framework

Looking at the developments on European level...

- **Transparency as a foundation for the transformation towards a "zero pollution" circular economy**

Brussels, 14.10.2020
SWD(2020) 247 final

COMMISSION STAFF WORKING DOCUMENT

Review of certain provisions of Regulation (EC) No 1907/2006 concerning the
Registration, Evaluation, Authorisation and Restrictions of Chemicals (REACH), as laid
down in its Article 138

The reports and reviews summarised in the previous section can help explain why there has been little improvement in the implementation during the last decade. These include lack of awareness of duty holders, absence of adequate information management systems in certain companies, technical difficulties derived from the complexity of articles and their chemical content and scarce information on imported articles. (S. 34)

Substances in articles lack of transparency
... in a dynamic regulatory environment

Supply Chain Communication status quo

- Restricted Substance List (RSL) and Manufacturing Restricted Substance Lists (MRSL) most common practice
- Suppliers provide general statements of conformity against the (M)RSL rather than information on actual substances

Problem:

- Data quality and reliability, information provided in compliance declarations is too scarce to check even plausibility
- Declarations report to product properties upon the date of delivery, refer to the substances listed on (M)RSL/SVHC list by this date

LIFE • ASK
REACH

Supplier impediments

- lack the data they should supply themselves
 - are not aware of (all) legal obligations on Substances in Articles
 - lack resources to collect data and provide it
 - hesitate to provide information because they perceive it confidential
- Request overload: Apart from few available sector standards, companies tend to create their own (M)RSLs, thus contributing to the proliferation of SiA requests to suppliers

LIFE • ASK
REACH

Supply Chain Action Goals

- Support proactive communication on SVHCs in articles
- Practical test of „state-of-the-art“ IT-tool by iPoint
(free of charge access for pilot companies and suppliers for testing until Aug. 2022)
- Feasibility studies of the Full Material Declaration approach in different supply chain contexts

LIFE • ASK
REACH

Benchmarking of tools and industry needs

Material Data System (MDS)

- Database: Suppliers report (all) substances in materials and (part-) articles
- Bill of Materials (BOM) (Structure tree)

„Full“ Material Declaration (FMD)

- Full declaration → „beyond compliance“
- Restricted Substance List (RSL; REACH, RoHS...)

Interoperability & Security

- FMD – 10% „Joker“
- Interoperability (e.g. IPC 175x, IEC 62474)
- Access control
- Data protection and integrity

Governance

- „Steering Committee“
- Contractual obligations
- Trust

From reporting of SVHCs to ...
traceability of substances in articles

Attach documents to send along with your request.

Regulations and Declaration

How much and which information do you need about the parts you purchase?

Regulations ⓘ

Select the regulations you need a compliance statement for.

☐	NAME	RELEASE DATE
☐	Proposition 65	9/15/19
☒	REACH Annex XVII	7/26/19
☐	TSCA 6(H)	9/28/21
☐	ECHA CoRAP	7/12/21
☐	SVHC mixtures	7/13/21
☐	RoHS (2011/65/EU)	3/12/19
☒	SVHC material	7/13/21
☐	SVHC each level	7/13/21
☐	REACH Annex XIV	6/28/21
☐	CMR 1A&1B	6/18/21

Do you need information on substances above regulation thresholds? ⓘ

☐ Noncompliance requires substance declaration.

A compliance statement is not enough? ⓘ

☒ Ask for product declarations instead of compliance statements.

Why Traceability of SiA?

- Support Compliance today – and tomorrow
...also with a view to circular economy (avoid „toxic material cycles“)
- More effective and efficient (risk) management: Suppliers and processes
- Data source for product design
- Foundation for credible transparency for consumer
- ...all can contribute to: New business models
